AutoCAD ½ Day Dimensioning Course

I already know how to dimension I don't need this course!

Well virtually every drawing that we receive is dimensioned incorrectly. Most people still do not use the annotative dimensions that were introduced in 2008. The aim of this course is to go over the majority of techniques used to add, edit, control and enhance dimensions in AutoCAD.

Our will be shown how to use all of the dimension commands including all the ones that you tend to ignore in the drop down lists, which are actually very handy. You will also be shown how to edit dimensions, create dimension styles, create dimension sub-styles, reduce the need for multiple dimension styles and of course annotative dimensions.

All our ½ day courses run from 9:15 to 1:15 with a mid-morning tea break. Lunch is not provided on ½ day courses.

All courseware is provided and is free to take with you.

Attendees of this course should already be able to competently use the basics of AutoCAD.

The **benefits** you will gain upon attending this course will be:

- ◆ Increase productivity, through producing quicker drawings
- ◆ Reduction in mistakes and increased accuracy
- ◆ Re-use of existing data
- ◆ Reduction in lead times.
