

Advanced Blocks - AutoCAD ½ Day Course

The aim of this course is to teach each delegate other features of blocks that can be used to make your drawing procedure more productive.

The **benefits** to you will gain upon attending this course will be;

- ◆ Increased productivity, through producing quicker drawings
- ◆ Reduction in mistakes and increased accuracy
- ◆ Re-use of existing data
- ◆ Reduction of lead times

You should already be familiar with how to use blocks via the Design Centre, Tool Palettes and Insert Block command as well as how to create a block. If you do not know this, you should attend our full one day block course instead, or our ½ block course followed by this ½ day course at a later stage.

All our ½ day courses run from 9:15 to 1:15 with a mid morning tea break. Lunch is not included on ½ day courses.

All course material is provided and is free to take with you.

Attendees of this course should already be able to competently use the basics of AutoCAD.

<u>Advanced Blocks</u>	Multiple Block Insertions Local & Global Blocks Special Block Properties Revising Blocks(Not LT)
<u>Attributes</u>	What are Attributes Inserting Blocks with Attributes Editing Attribute Values (Not LT) Defining Attributes Re-defining Blocks with Attributes (Not LT) Extracting Attributes (Not LT) Attribute Strategies
<u>Dynamic Blocks</u> (2006 Onwards Only) Time Permitting on 1/2 day course	Working with Dynamic Blocks Creating Dynamic Blocks(Not LT) Dynamic Block Authoring Tools (Overview) (Not LT)

NOTE: Course content may alter depending upon the version of AutoCAD used.
