

AutoCAD 2004 Level 2

Table of Contents

Module 1: Productivity Tools

- Section 1: Working Efficiently with AutoCAD
 - Using the Right-Click Shortcut Menus
 - Using the Keyboard Effectively
 - Controlling the Drafting Settings (Review)
 - Self Check: Working Efficiently with AutoCAD
- Section 2: Quick Editing Techniques
 - Double-click Editing
 - Using Grips Effectively
 - Object Selection Tips
 - Working in Multiple Drawings
 - Self Check: Quick Editing Techniques
- Section 3: Viewing What You Need
 - Creating & Using Drawing Views
 - Creating Multiple Viewports
 - Partial Open and Partial Load
 - Self Check: Viewing What You Need

Module 2: Advanced Object Types

- Section 1: Polylines and Regions
 - Using Complex Polylines
 - Polylines with Other Commands
 - Editing Polylines
 - Creating Complex Boundaries
 - Working with Regions
 - Command Summary
 - Self Check: Polylines and Regions
- Section 2: Multilines (Optional)
 - Drawing with Multilines
 - Editing Multilines
 - Multiline Styles
 - Command Summary
 - Self Check: Multilines
- Project Exercises: Advanced Object Types

Module 3: Advanced Blocks and Attributes

- Section 1: Advanced Blocks
 - Blocks and DesignCenter
 - Blocks in Tool Palettes
 - Multiple Block Insertions
 - Creating Local and Global Blocks
 - Special Block Properties
 - Revising Blocks
 - Command Summary
 - Self Check: Advanced Blocks
- Section 2: Attributes
 - What are Attributes?
 - Inserting Attributes
 - Editing Attribute Values
 - Defining Attributes
 - Redefining Blocks with Attributes
 - Extracting Attributes
 - Attribute Strategies
 - Command Summary
 - Self Check: Attributes
- Project Exercises: Advanced Blocks and Attributes

Module 4: Referencing and Sharing Information

- Section 1: External References
 - Working with External References
 - Attachments vs. Overlays
 - Working with XREF Layers
 - Opening and Editing XREFs
 - Binding XREFs
 - Clipping an XREF
 - Command Summary
 - Self Check: External References
- Section 2: Working with Images
 - Attaching Raster Images
 - Editing Raster Images
 - Controlling the Draw Order
 - Command Summary
 - Self Check: Working with Images
- Section 3: Other Tools for Collaboration
 - eTransmit
 - Hyperlinks
 - Object Linking and Embedding
 - Self Check: Other Tools for Collaboration
- Project Exercise: Referencing and Sharing Information

Module 5: Layouts and Plotting

- Section 1: Working with Layouts
 - Layout Concepts: A Review
 - Copying Layouts
 - Controlling Viewport Display
 - Creating Additional Viewports
 - Annotating Layouts
 - Command Summary
 - Self Check: Working with Layouts
- Section 2: Advanced Plotting Features
 - Managing Plotters
 - DWF Plotting and Viewing
 - Publishing Drawing Sheets
 - Publish to Web
 - Plot Styles
 - Self Check: Advanced Plotting

Module 6: Drawing Standards and System Setup

- Section 1: Maintaining Standards
 - Drawing Standards
 - Managing Layers
 - Managing Dimension Styles
 - Self Check: Maintaining Standards
- Section 2: CAD Standards
 - CAD Standards Concepts
 - Configuring Standards
 - Checking Standards
 - Layer Translator
 - Self Check: CAD Standards
- Section 3: System Setup
 - The Options Dialog
 - Hows and Whys of System Variables
 - Drawing Utilities
 - Drawing Security
 - Self Check: System Setup

Module 7: Introduction to Customization

- Section 1: Getting Started with Customization
 - Why Customize?
 - What Can be Customized?
 - Saving Settings in a Profile
 - Creating Custom Toolbars
 - Customizing the Keyboard

Writing Macros
Self Check: Getting Started with Customization

Section 2: Loading and Running Custom Components

Running Scripts
Loading Menus
Programming for AutoCAD
Using AutoLISP Routines
Loading and Running VBA Macros
Command Summary
Self Check: Loading and Running Custom Components

Module 8: Introduction to 3D

Section 1: Working in 3D

3D Concepts
Types of 3D Objects
Viewing in 3D
AutoCAD's 3D Coordinate System
Introduction to the User Coordinate System
Command Summary
Self Check: Working in 3D

Section 2: Solid Modeling

Solid Concepts
Solid Primitives
Creating Complex Solids
Command Summary
Self Check: Solids Modeling

Section 3: Visualization Techniques

Rendering Concepts
Adding Materials to the Model
Scenes and Lighting
Adding Bitmap Images
Command Summary
Self Check: Visualization Techniques

Skills Assessment
